

# LumenTask™ Undercabinet Lighting

## Enriching color and clarity with high intensity, low maintenance Xenon lighting in 4 lengths.

The challenge of a superior lighting fixture is to not only shed light on the subject, but also to add a new dimension to the interior scene. LumenTask™ undercabinet lighting by GM Lighting incorporates a sleek, clean and unobtrusive housing that is home to the newest lighting source contender, one of the purest and longest lasting lighting sources - Xenon. Xenon has a brilliant history in the medical and automotive field where efficiency and accurate rendition is key.

## When compared with halogen, Xenon runs cooler, lasts longer, and burns brighter.

Xenon is the heart of LumenTask, but it isn't the only benefit we offer. Electrical contractors agreed that the industry needed a more reliable, cool running undercabinet fixture that allowed for easy maintenance and installation.

## “Open Wide” lets you get in and wire with both hands effortlessly while LumenTask stays open

Accessing the interior of LumenTask without dismounting is easy. Our Open Wide design keeps the fixture open and your hands free to wire. By simply depressing the wire compartment holding tab, the wiring compartment cover swings down and out, and stays in position until you're ready to snap it back in its closed position, and slide the lens back in place. Installing and maintaining undercabinet has never been easier.

Unique ceramic base lamp

Xenon Performance Stats		
	12V Xenon	120V Xenon
Lamp Life (hours)	10,000	5,000
Color temp	3,000°K	2,900°K
